

inspire with efficiency:
today, tomorrow, together.

Six words. One approach.

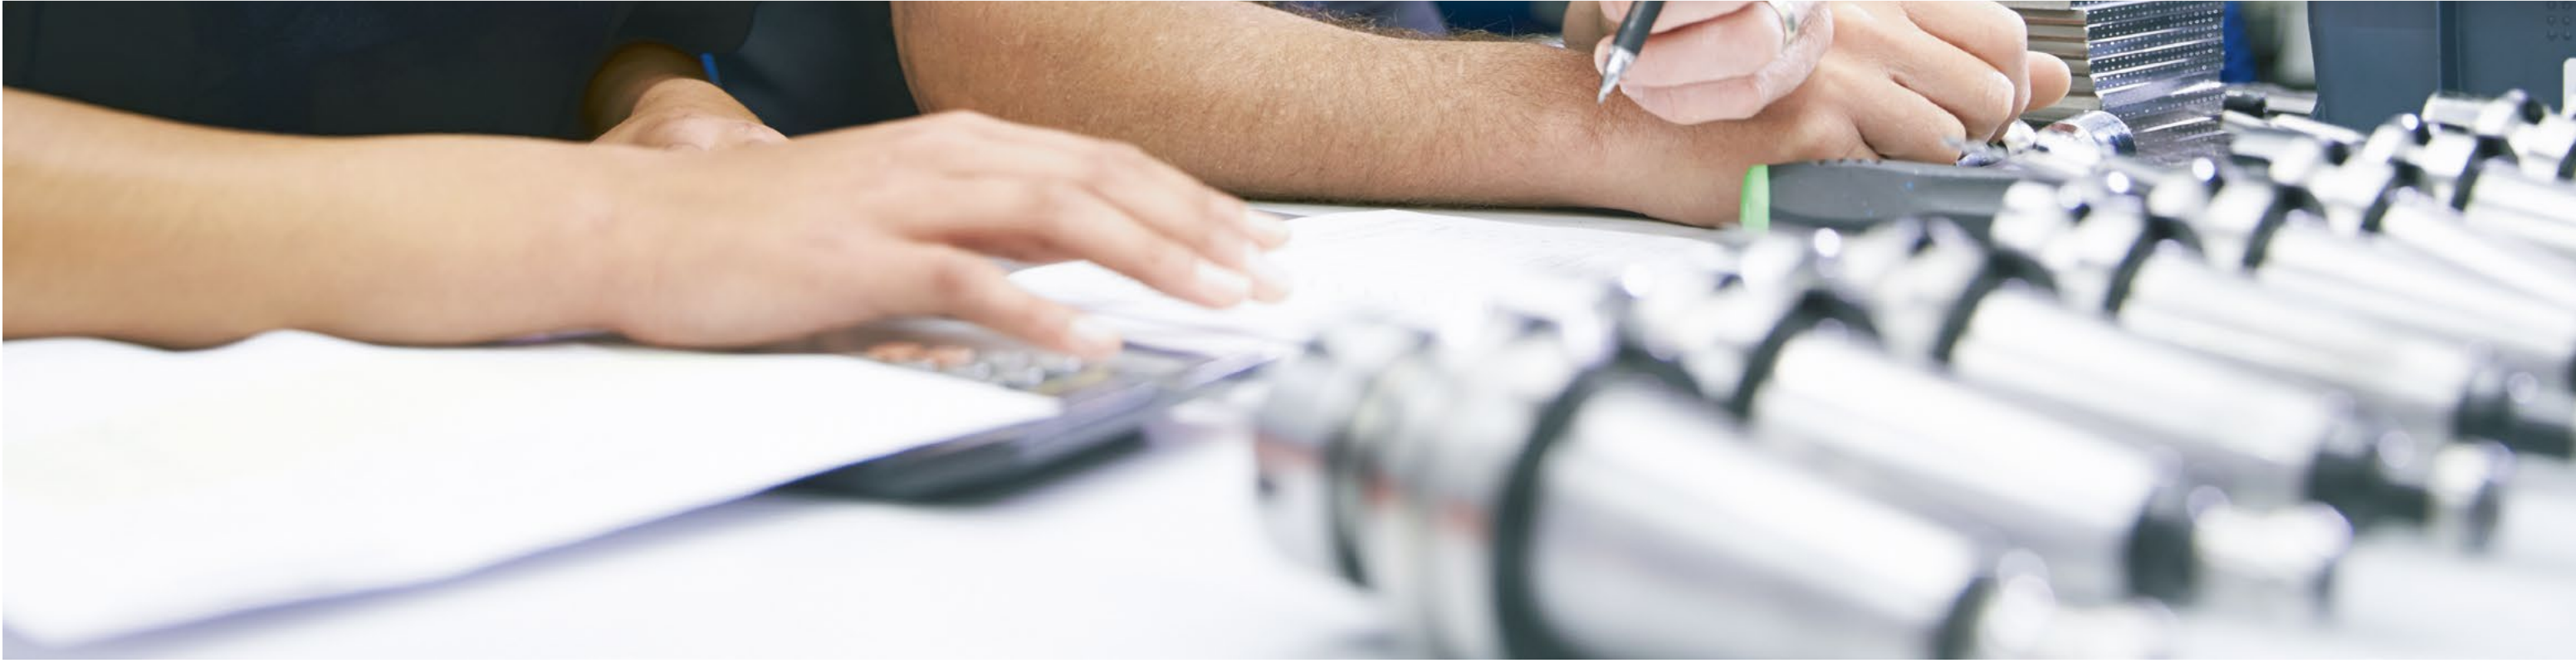

inspire with efficiency:

Efficiency is the driving force behind our services. Our holistic approach ensures a noticeable difference between effectiveness and efficiency.

today, tomorrow, together.

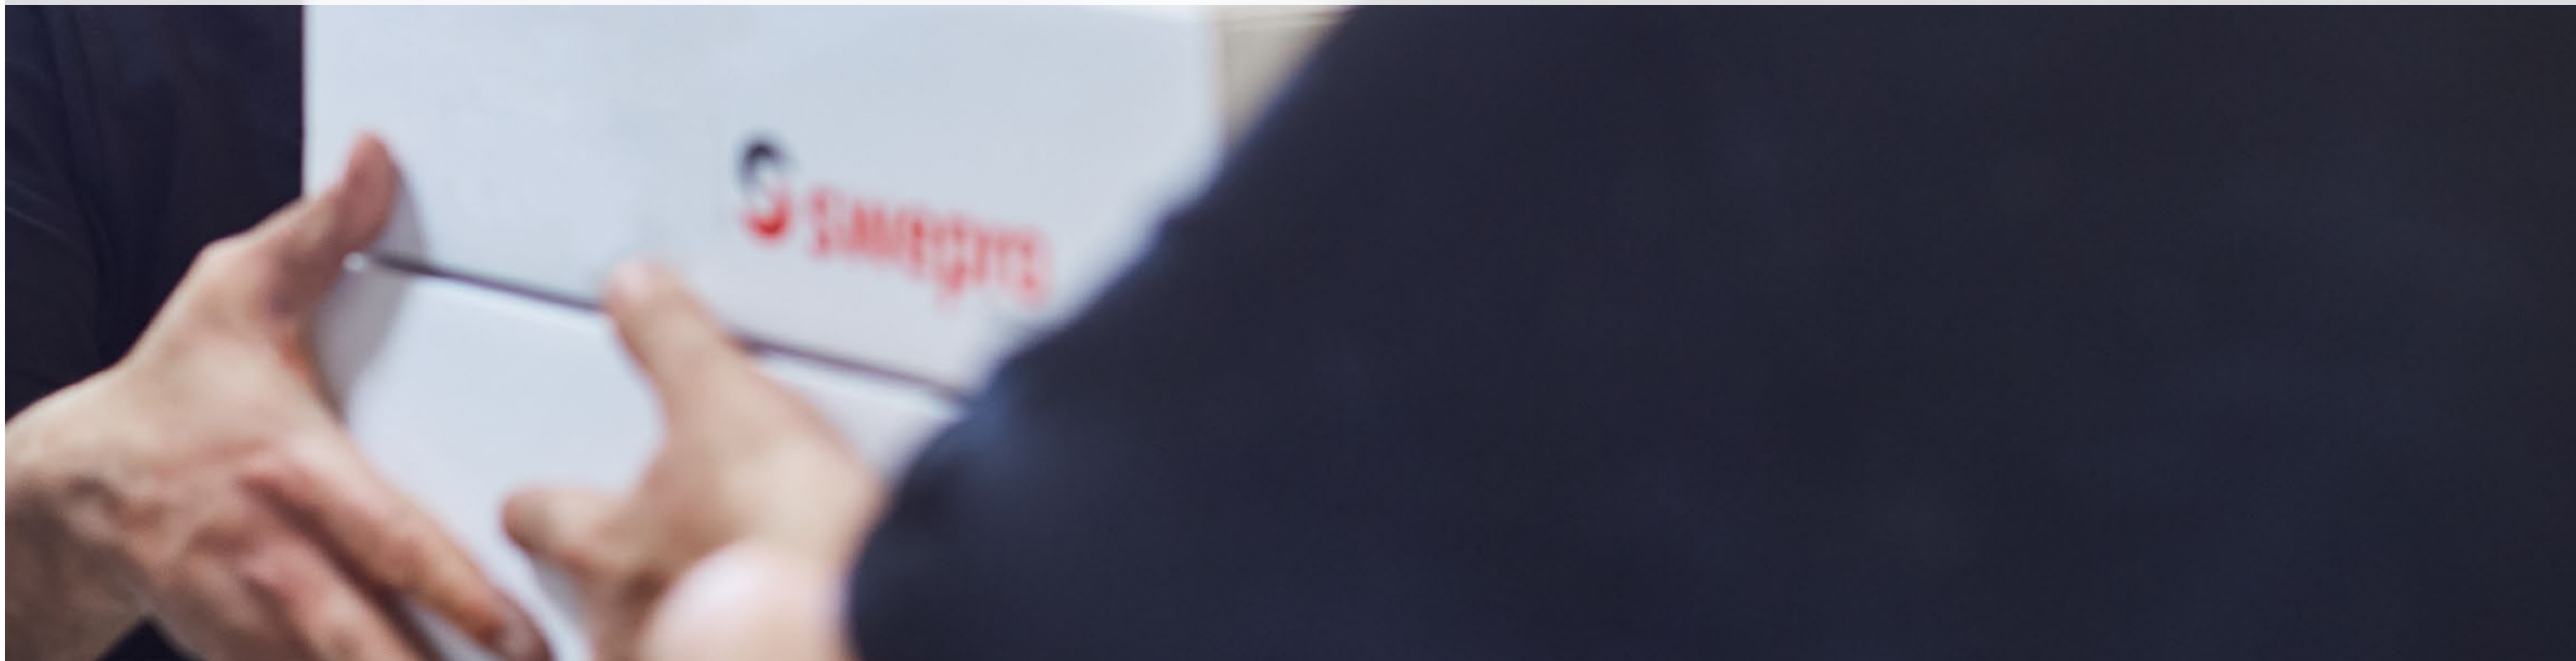

Through overview, competence and personal advice, we support our customers and market partners with the right components for the relevant application.

inspire with efficiency:

today, tomorrow, together.

We promptly deliver product and system solutions.

inspire with efficiency:

today, tomorrow, together.

Together with our customers, we develop products and systems for optimum performance in respect of assembly, production and production processes, as well as maintenance.

inspire with efficiency:

today, tomorrow, **together.**

Cooperation is the basis for success. The combination of professional competence, communication and development know-how leads to efficient results.

14 locations worldwide.

150 employees ensure that swepro supports customers and partners worldwide, every day.

4 BUSINESS AREAS

swepro at a glance:

Tools

We facilitate physical work - to us, power and handling are at the same level.

Compressed air nozzles

We give compressed air a direction - thus enabling higher-quality products, noise reduction and cost savings.

Spray nozzles

We get to the heart of streams - and precision is the focus of our work. This allows us to achieve a long service life and extremely precise spray patterns.

Electrostatic

We work with ions - in doing so, we improve processes, increase product quality and protect employees.

Experienced in 27 sectors worldwide.

Over 35 years of engineering. Numerous patents and registered designs.

SW 3371M Micro grinder
High-speed 60,000 1/min, compact and short design

SW 55SP002 Industrial air screwdriver straight type
Low-noise and low vibration, durable and powerful vane motor

SW 919DC-6 Random orbital sander - central-vacuum
Strong and noise reduced - 76 dB(A)

SW 618-V Air Riveter
Ergonomic riveter with an attachable collecting container for rivet mandrels

Tools.

Our tool solutions are as diverse as the applications for which they are needed.

From particularly powerful impact wrenches, to noise-reduced surface grinders to adapters that prevent leakages,

our tool solutions always offer noticeable added value for our customers.

SW 2200AH Flux Chipper
Separating or cutting of sheet metal, the cutting off of bolts, rivets, tiles or plaster and slit work

SW 5830P Air impact Wrench
2440 Nm after 5 seconds

SV 707-L VA-Laval nozzle
78% noise reduction

SV 9005W Zytel-Flat nozzle
59% cost savings

SV 007-L Air safety gun with VA-Laval nozzle
Highly concentrated air stream that moves at supersonic speed

Compressed air nozzles.

Dealing with compressed air for responsibly.

By using our compressed air nozzle solutions, our customers are supported, in producing high-quality products, reducing noise and saving energy costs.

At the same time, the resource-saving use of compressed air eases the burden on the environment.

SV 366 Air curtains with angled flat nozzles
Broad and flat air cone, suitable for machine designs where space is limited.

SV 767-L-500 Air safety gun
High performance, blowing force 20 N

Flat fan nozzle pro series
e.g. for coating products

Solid stream nozzle pro series
e.g. for point cleaning

Spray nozzles.

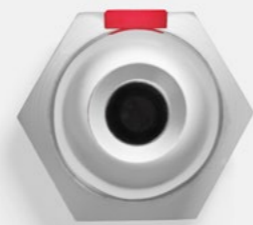

Because all liquids are different.

Spraying agents behave very differently depending on the type, flow, quantity and pressure applied. This knowledge flows into the continuous development of our spray nozzle solutions.

As a result, our spray nozzles convince through particularly precise spray patterns, extended service life and easy assembly.

Full cone nozzle pro series
e.g. for material cooling

Hollow cone nozzle pro series
e.g. for disinfection

SI FN500 antistatic flat nozzle
Ideal for difficult to access areas, for the discharge of small to medium surfaces

SI SNG500 antistatic nozzle gun
Mobile use, for tackling static charging for 3-dimensional objects

Electrostatic.

Electric charge under control.

Uncontrolled electric charges lead to increased rejects, quality defects and form an increased safety risk.

With our electrostatic products, we eliminate these faults and provide our customers with seamless processes and more security.

SI A200 air supported antistatic bar
Increased range by air support

SI BN antistatic air nozzle
Ideal for difficult to access areas, accurate discharging

Mission.

inspire with efficiency: today, tomorrow, together.

"swepro's strength lies in its unique technological diversity. We develop technologies and solutions for current and future market and customer needs.

The focus of our work is always a commitment:

Advancing our customers through outstanding engineering skills. For that, knowledge is our most important raw material. What makes us different is how we allow competences and experiences to link, share and grow in the interest of our customers."

Andreas Lázár, CEO

Company.

Sustainable optimisation.

With the value-added chain in mind, together with our industrial customers we find a sensible balance between production time, investment and operating costs. This is how we create the basis for efficient processes and the use of the right tools and production components.

Vision.

Leading the way with innovations, brands and products.

Worldwide available manufacturer and supplier of tools and manufacturing components, always close to the processes of our customers. Because there are worlds between inquiry and delivery - we merge these into inspiring solutions.

Values.

Point of references for business development.

Our values guide us in our actions, in making decisions and in our behaviour. Every day, we make numerous decisions in constantly changing times. We come from many cultures, have different experiences and are active in different markets and sectors.

Therefore, clear values that are shared, understood and observed by everyone at **swepro** are so important to our lasting success:

- **Customers and users**
- **Employees**
- **Success**
- **Generations**

Customers and users.

Always the main focus.

swepro always responds to the expectations and wishes of customers and users in order to best meet these. We offer the highest value, quality, and service, as well as attractive innovations, and technologies.

Our actions focus on our customers and consumers and they enjoy our highest appreciation. This is fundamental to our long-term development as a company and to our

success. To ensure the best products and innovations, as well as the highest quality and excellent service, we always think one step ahead.

On this basis, we achieve profitable growth worldwide through leading positions in our relevant markets and business segments.

Our employees.

Community cooperation, because we value, encourage and challenge each other.

**A global team.
Connected by strong values.**

We treat each other with respect, continuously develop our abilities and promote diversity in all relevant dimensions. We act with individual responsibility and integrity.

Every employee makes a significant contribution. Their experience, their knowledge and their creativity form the basis for our competitiveness.

Success.

Success has different meanings and is expressed by many signs and symbols.

We work with a healthy mixture of heart, mind and resourcefulness, to achieve economic success.

The strengthening of our customers and the personal success of our employees lead to the further development of **swepro** and thus to economic growth - our attitude for long-term success.

Generations.

Character and tradition.

swepro is proud of its tradition of sustainably operating and growing. Since its foundation in 1979, the family Lazar shape the company.

We appreciate the partnership-like, respectful, and inter-generational interaction be affected by youthful vigour and long-term vision. This creates space for security, identity and

development. Our position and mutual trust unite us in the pursuit of a common goal:

“To create sustainable success for future generations.”

swepro.

History and contact.

In addition to a top product and delivery performance, continuous internationalisation is another important strategic goal for us.

Believing that all the key success factors should be mastered, together with our customers and market partners we are developing **swepro** into one of the leading brands for nozzle and spray systems, as well as industrial tools and electrostatic solutions.
