SI PU Power Unit - with four HVC connections (230V)

The SI PU Power Unit is required to power swepro IONic antistatic products.

Your benefits are constant performance,
prevention

of voltage fluctuations and long service lives
- with no drop in performance. The Power Unit
has

four high-voltage connectors to address the
broadest

application scope as possible. This means up to
four antistatic products can be powered
simultaneously

with a constant high voltage.

HVC connections: 4

Prim. volts: 230V

Sec. volts: 4,8kV

Hertz: 50-60Hz

Fuse: 250mA

Sec. current: 5mA

Effekt: 24VA

Protection: IP65

Technical data

Item number	940000
Weight	3,550 kg
Dimensions LxWxH	160 x 160 x 100 mm
Material	Aluminium
